

Commercial Pressure Booster Systems

Why AquaMark?

- **Quality, built for the long haul. Two-year warranty.**
- **Best customer service in the industry. We truly care about you and your customer. (800) 323-4498.**
- **Designed with components that are serviceable.**
- **Preassembled, preprogrammed, and pretested.**
- **Includes:**
 - Ebara pump(s). Quiet, reliable, efficient, field proven.
 - Amtrol expansion tank. Functions in conjunction with variable frequency drive and pump to maintain system control.
 - Two liquid filled gauges (liquid filled gauges provide rock steady gauge needle).
 - Two quarter turn gauge cocks (allows for servicing of transducer, gauge(s), low pressure sensor, without having to shut down the unit).
 - Heavy duty inline spring-loaded check valve.
 - Easily replaced transducer with Packard connector.
 - Reliable preprogrammed variable frequency drive, prewired with electrical whip.
 - Boiler drain with cap for easy maintenance.
 - Pressure relief valve.
 - Heavy duty ¾" thick mat, non-mildew, solid rubber for vibration isolation on floor.
 - Vibration isolator for discharge piping, helps eliminate noise transmission throughout copper pipe water distribution system. (Comes zip-tied to the support post for the variable frequency drive).
 - Heavy duty steel plate with welded steel u-channel support underneath. Painted gray.
- **Compact, complete pressure boosting system. No need to shop for other items.**
- **Plumb, wire, turn it on. No need for "start-up fees".**
